

3D Picture

When Jesus was Baptized

- Cut out each part, then glue together in layers to form a 3-D picture. Refer to the photo for the order in which to glue the parts. (Optional: You can rearrange the pieces.)

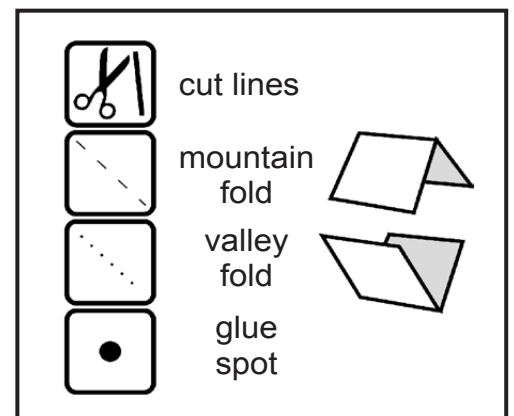

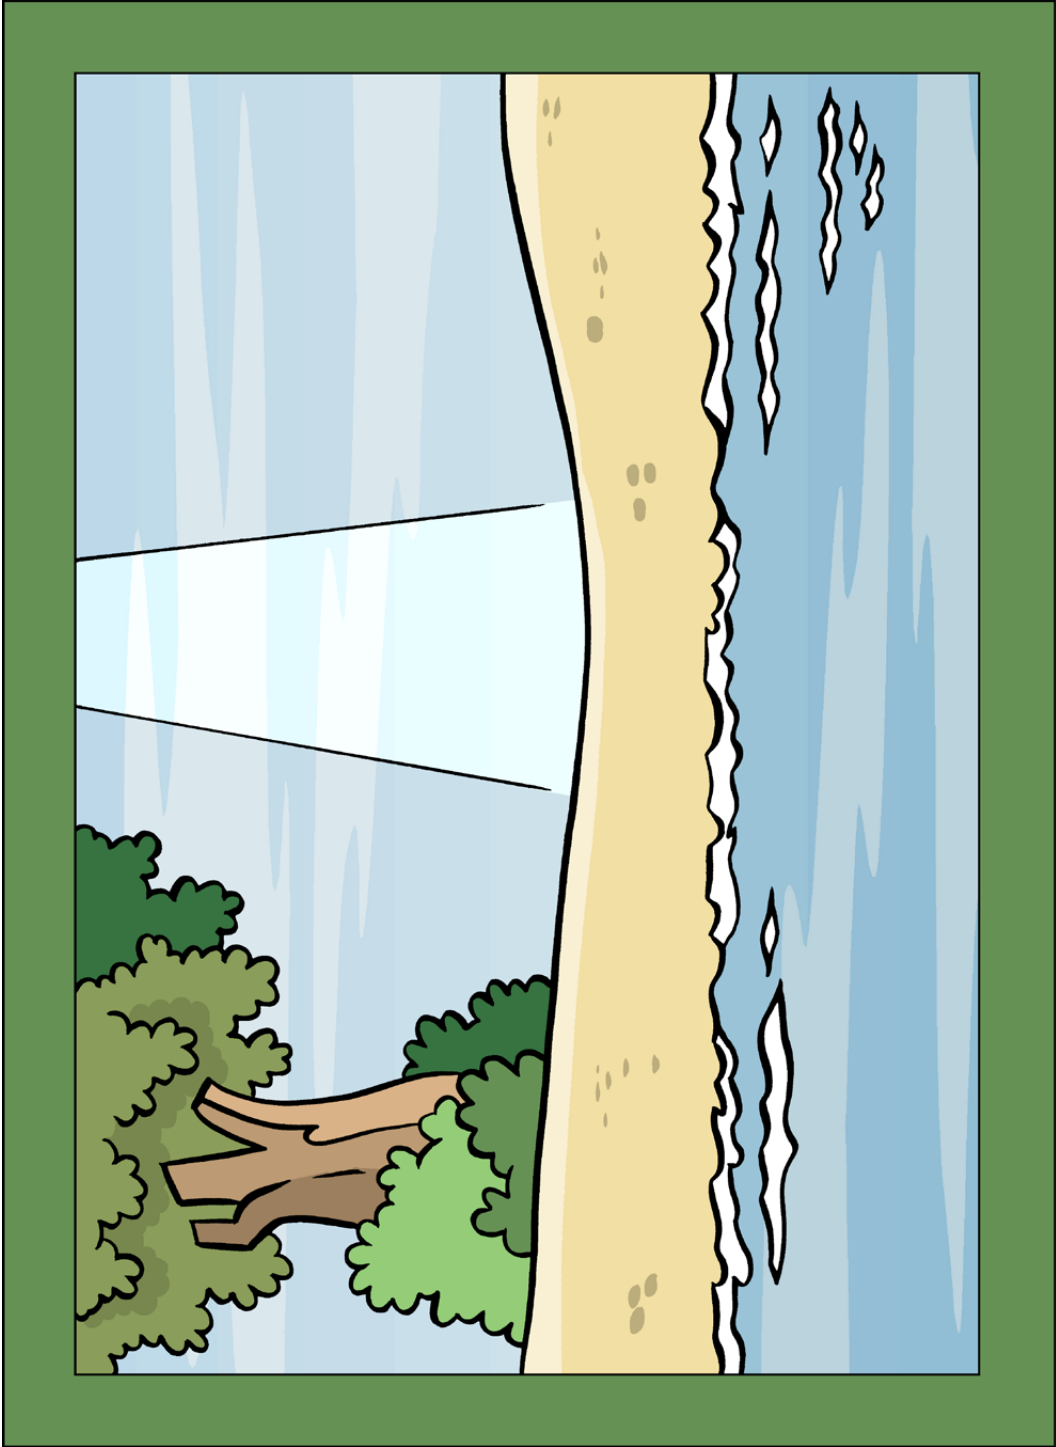

- Between each layer, glue various thicknesses of foam or cardboard to raise each level slightly higher than the previous layer. (Instead of craft foam, you can use a piece of Styrofoam used for packaging to cut into small pieces for forming the different layers.)

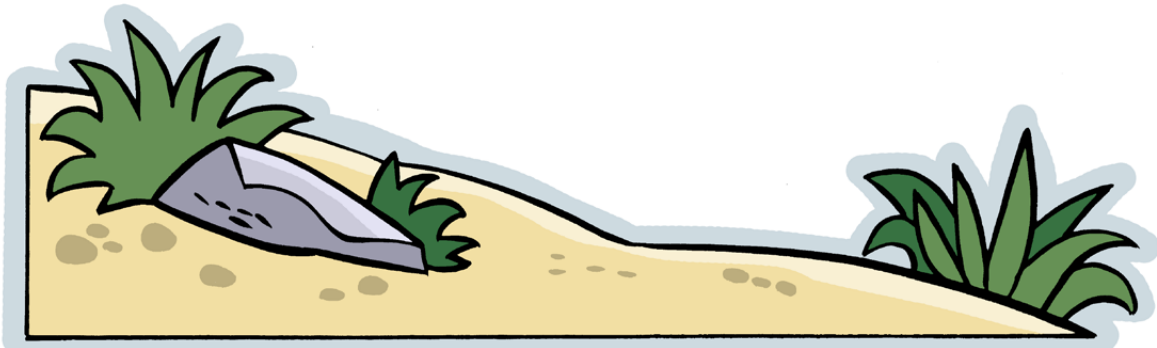

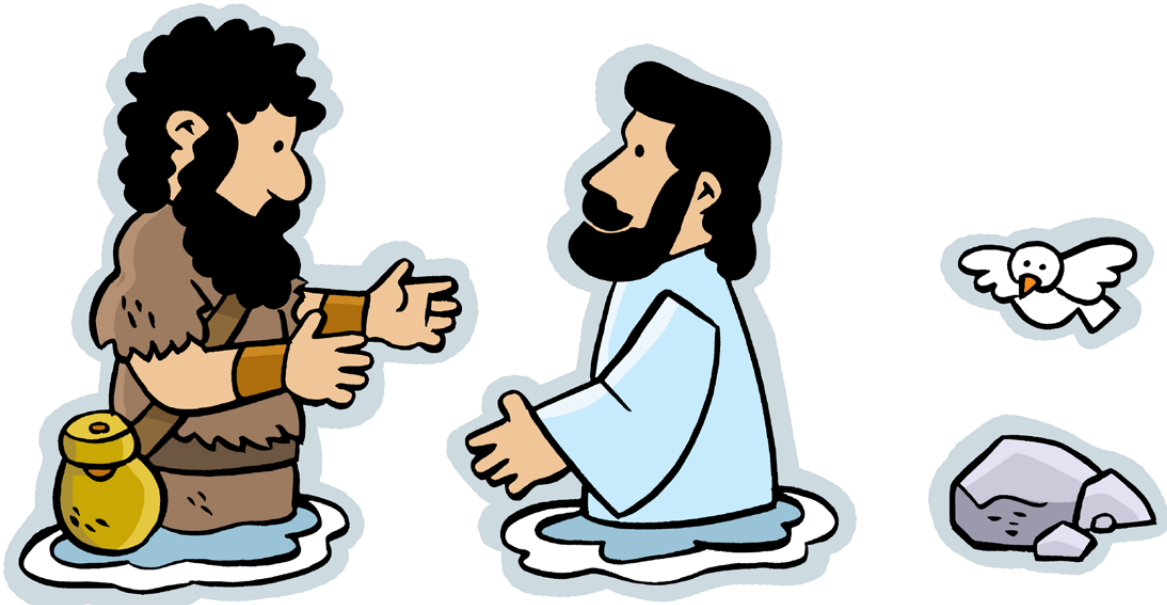

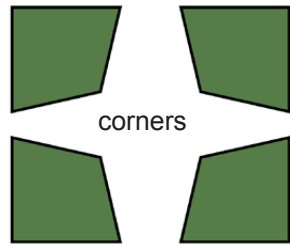

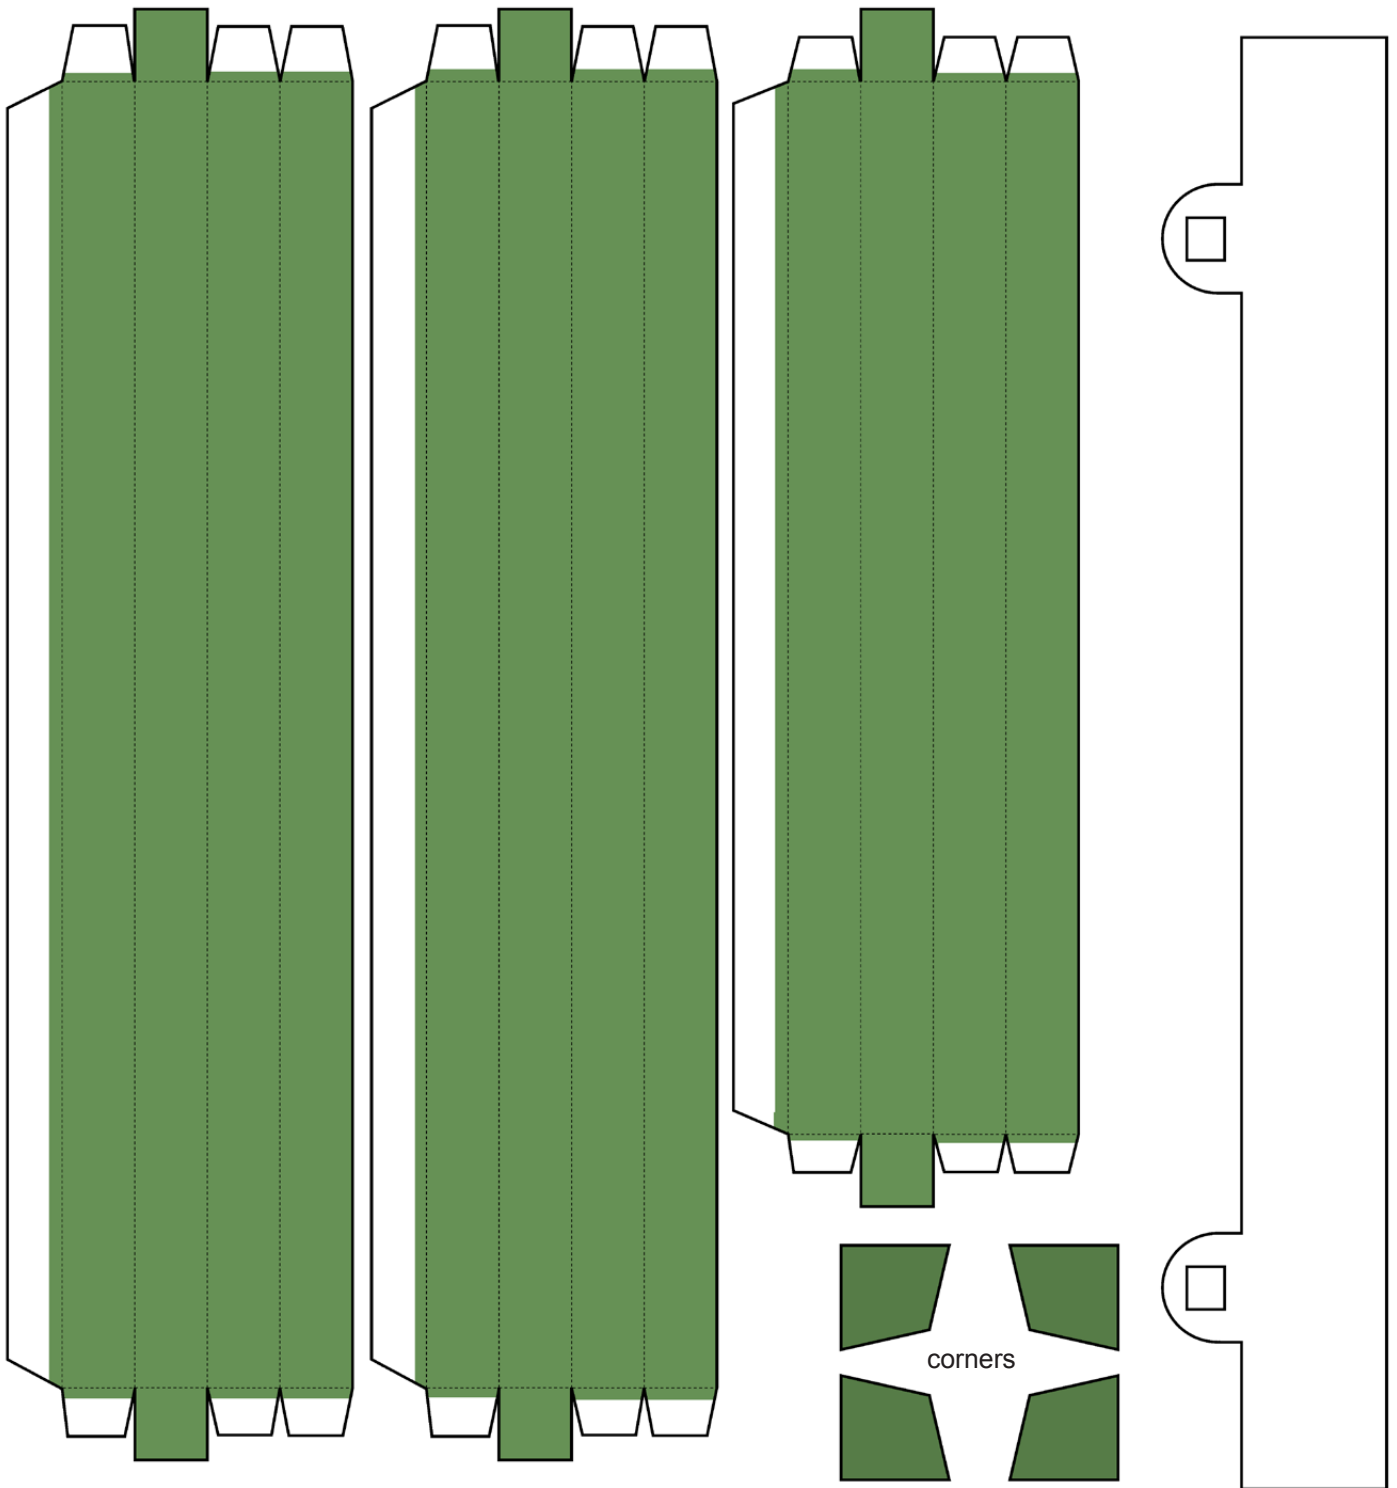

- Tips: Print pages 2, 3, and 4 on cardstock. Use white glue. Before adding glue to the pieces, it helps to position the pieces on the scenery to see how they fit.
