## The Parable of the Lost Sheep

Read this parable  
in Luke 15:4-7.

$27 + 27 + 2 =$

$44 - 5 =$

$4 - 3 =$

$3 + 11 + 8 =$

$16 + 11 =$

$46 - 19 =$

$90 - 53 =$

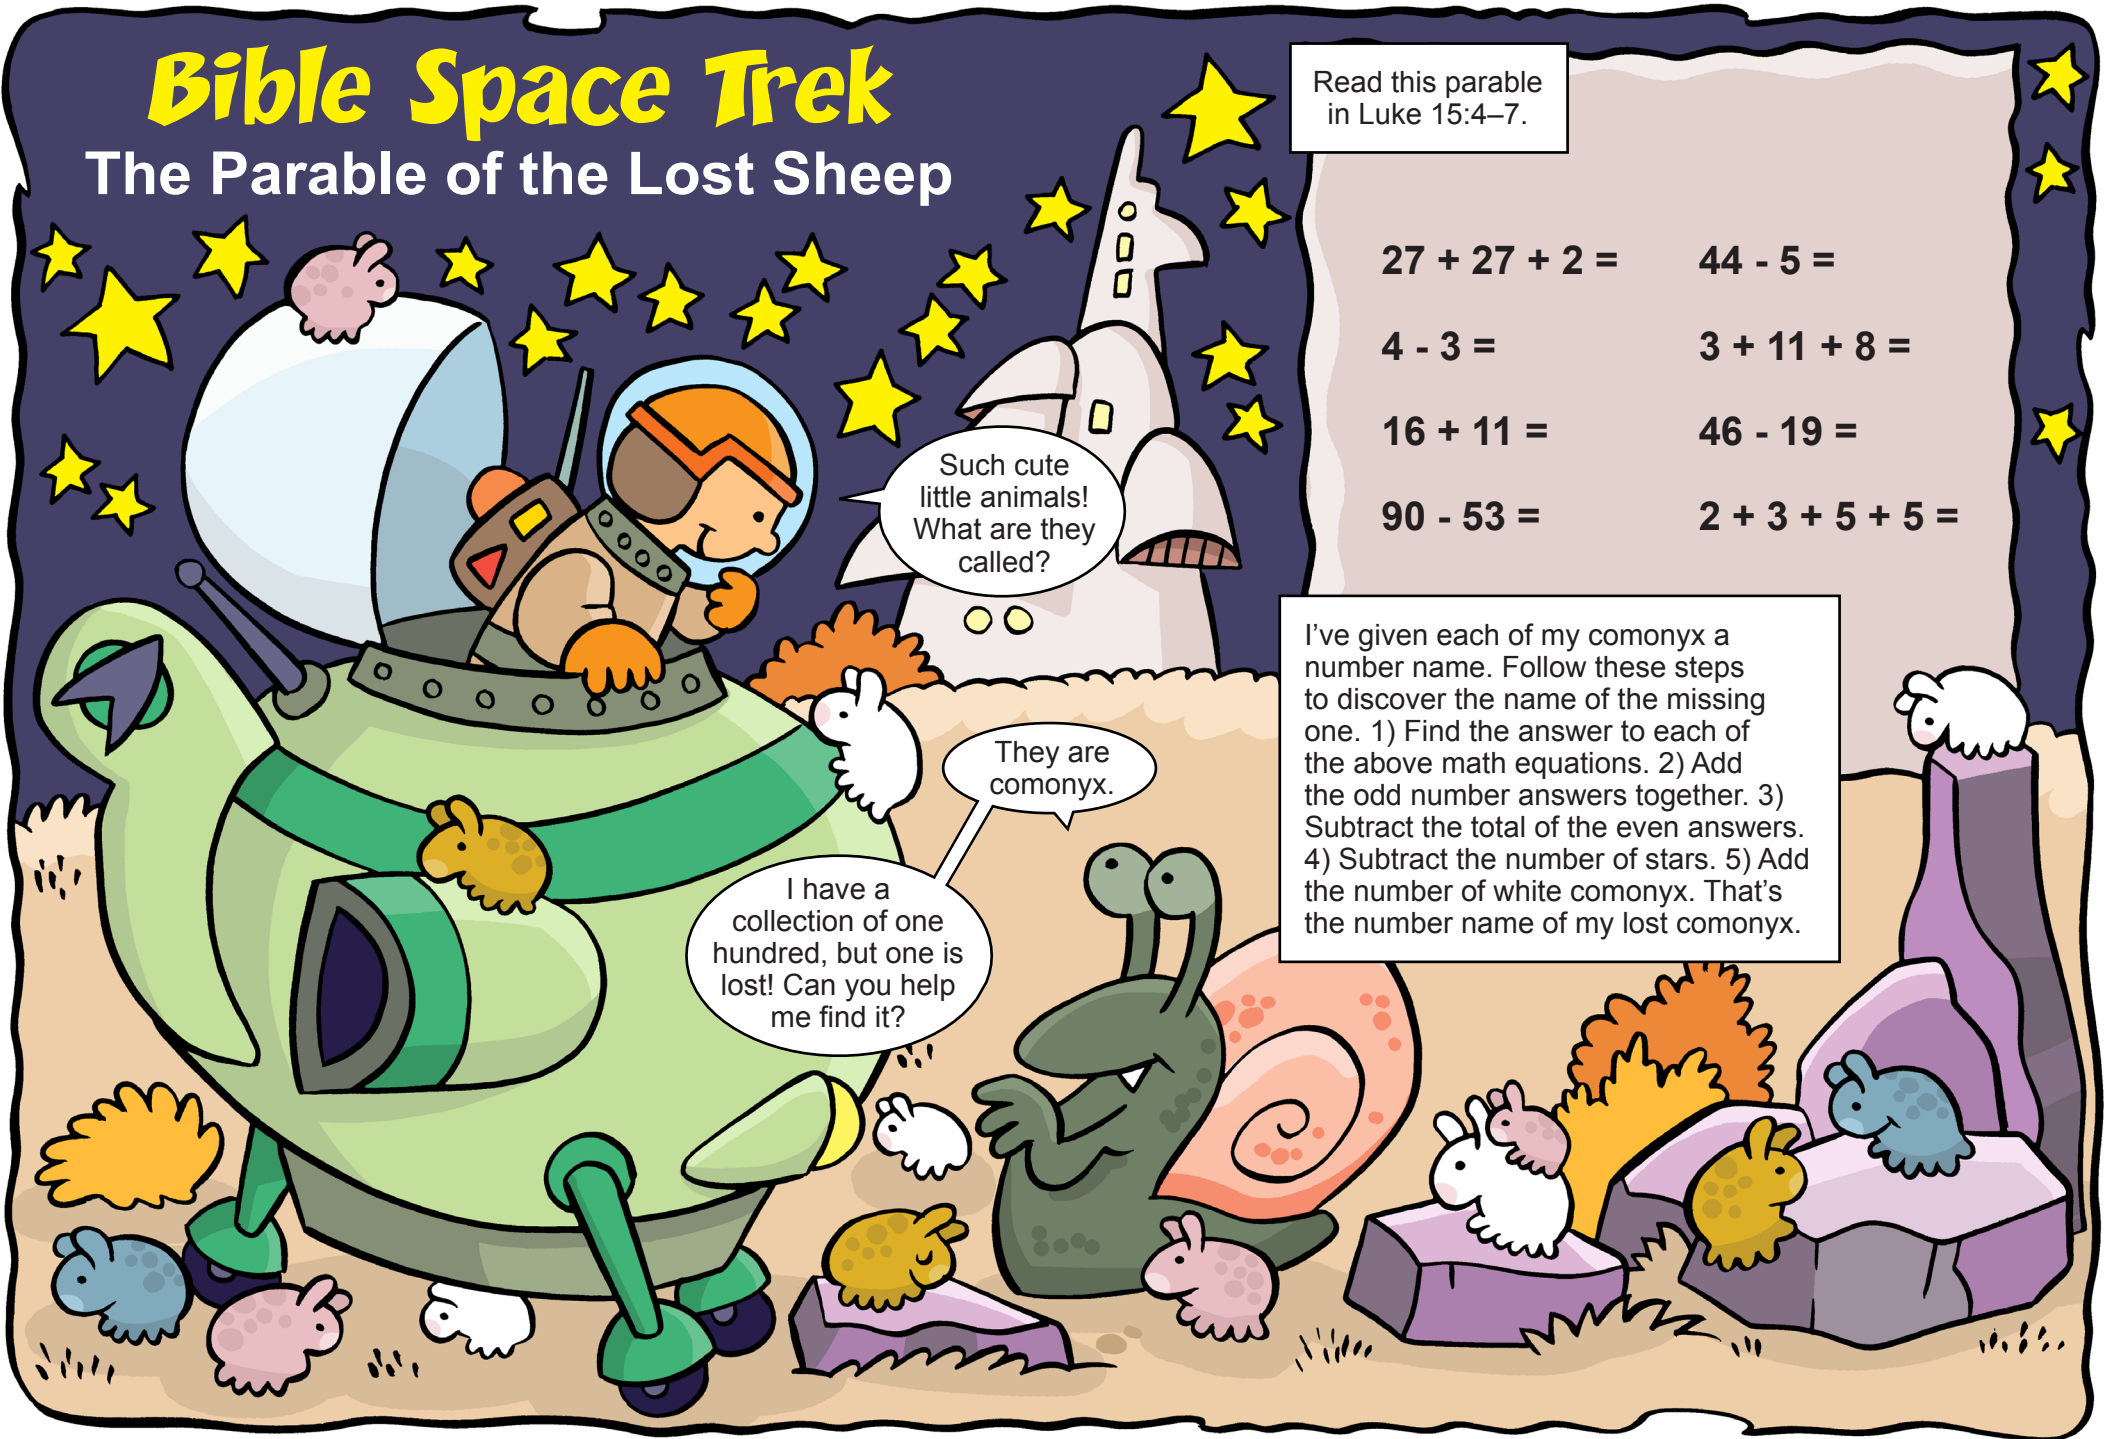

$2 + 3 + 5 + 5 =$

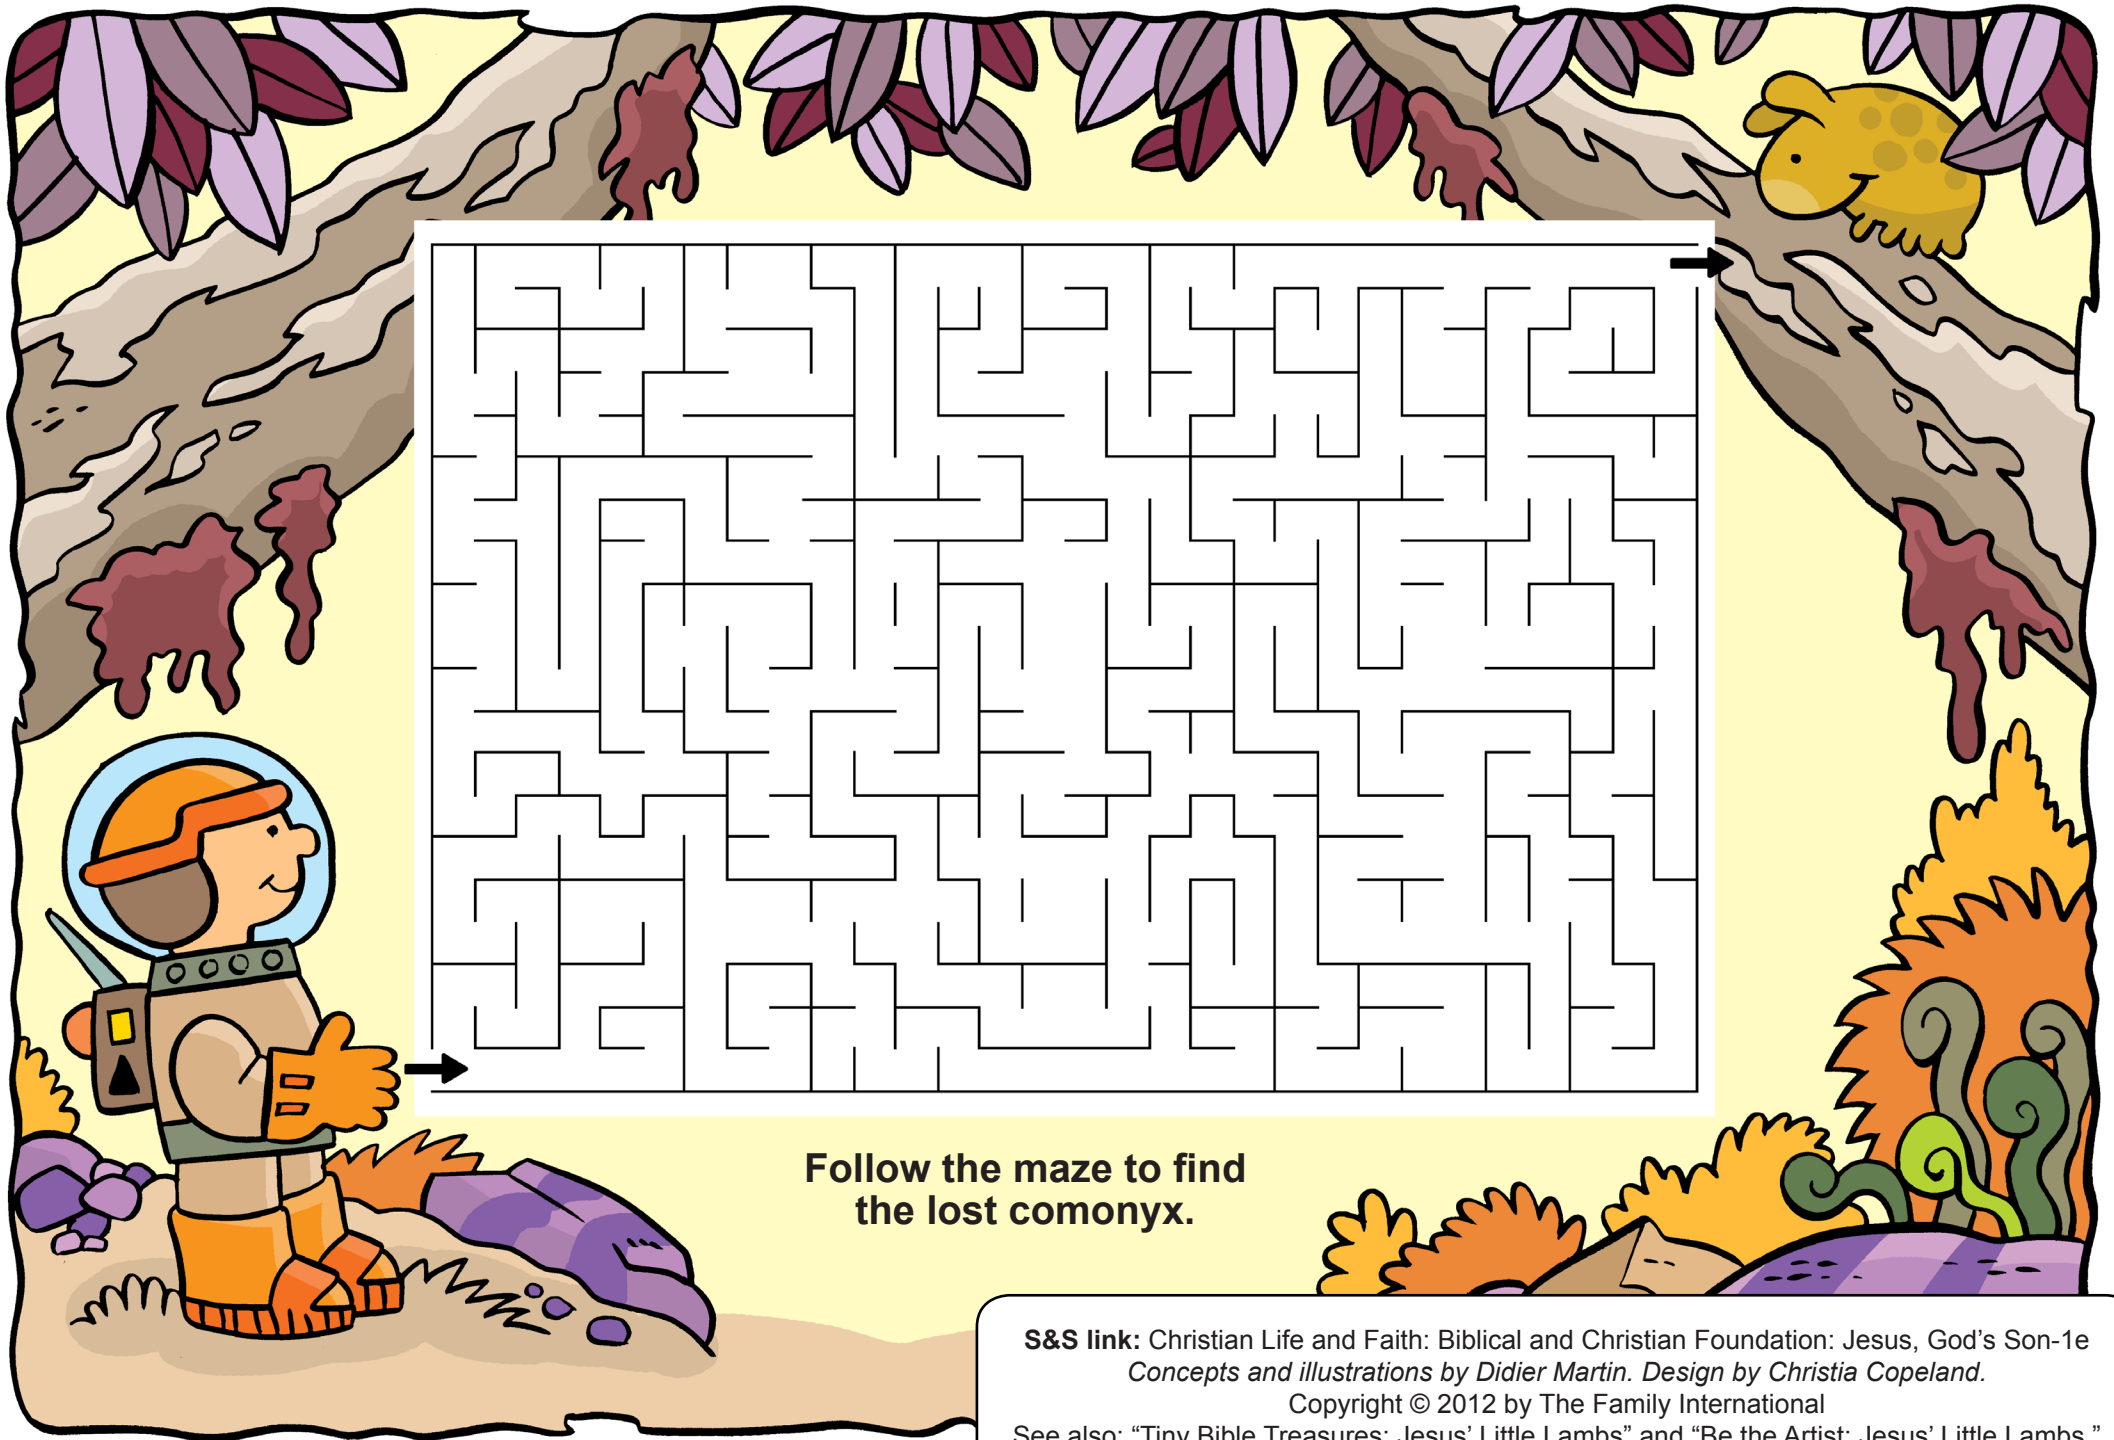

Such cute  
little animals!  
What are they  
called?

They are  
comonyx.

I have a  
collection of one  
hundred, but one is  
lost! Can you help  
me find it?

I've given each of my comonyx a number name. Follow these steps to discover the name of the missing one. 1) Find the answer to each of the above math equations. 2) Add the odd number answers together. 3) Subtract the total of the even answers. 4) Subtract the number of stars. 5) Add the number of white comonyx. That's the number name of my lost comonyx.

**Follow the maze to find  
the lost comonyx.**
